Ideas To Reality

case study on

Health Hubcare

PROJECT OVERVIEW

The client's goal is to create the first complete continuum care provider on web and app platforms. This innovative digital solution offers a variety of healthcare services for people with acute, post-acute, and chronic conditions. These services go beyond critical care facilities and reach patients at their homes. Through the app, users can access different assessments, customized diet plans, and complete health records. The app also allows users to book appointments, giving them a convenient and holistic healthcare experience at their fingertips.

CLIENT DETAILS

Name: **Confidential**

Location: **India**

Industry: **Health care**

TECHNOLOGY DETAILS

- **React Native**
- **.NET Core**
- **MS SQL**
- **Angular**
- **Web API**
- **EF Core**
- **LINQ**
- **Dapper**

PROJECT FEATURE VIEW
